

FOR IMMEDIATE RELEASE

### ***Final Cut Pro Users Score Better Productivity with Key Composer™***

#### **Contour Design Unveils New Macro Capability for Macintosh ShuttlePRO V.2 Jog/Shuttle Users at MacWorld Expo**

**WINDHAM, NH - January 5, 2004** - Contour Design, Inc., a leading provider of innovative, ergonomic computer input devices, announced today the release of Key Composer™, exciting new keystroke macro creation and management functionality for its ShuttlePRO V.2™ multimedia jog/shuttle controller. Contour Design will be featuring the ShuttlePRO V.2 with Key Composer for Macintosh at this week's MacWorld Expo, being held January 6-9 at the Moscone Center, San Francisco. Contour Design will be exhibiting in Booth #1042.

#### **Access Multiple Keystroke Combinations with One Touch**

With Key Composer, Macintosh audio/video application users can now assign multiple keystroke combinations, or macros, to execute from a single button on the ShuttlePRO V.2. These macros can be executed either all at once, or step by step, giving ShuttlePRO V.2 users much more control over audio/video applications. In Final Cut Pro for example, users can now:

- Automate repetitive multi-step tasks
- Group similar commands, views, or tools to a single button
- Control your VTR or camcorder with precision

#### **Leading Video and Audio Applications Support**

The ShuttlePRO V.2 is pre-programmed to make editing fast and easy right out of the box for many leading audio and video applications, providing productivity for users across their entire production workflow. Supported Macintosh applications include Apple Final Cut Pro and Final Cut Express, Avid Express DV, Alias Wavefront Maya, Digidesign ProTools, Emagic Logic Audio, Macromedia Flash MX, MOTU Digital Performer, Steinberg Cubase SX and Nuendo, and many more. Through an intuitive control panel interface, the ShuttlePRO V.2 is easily programmed to work with virtually any application.

#### **Availability and Pricing**

Key Composer is built into Version 2.5 of the Macintosh driver for the ShuttlePRO V.2, available via free download from the Contour Design web site ([www.contourdesign.com](http://www.contourdesign.com)). A version for Windows users is also available.

The ShuttlePRO V.2 is available now through Contour's extensive network of distributors and resellers. The suggested retail price of the ShuttlePRO V.2 is \$129.95.

#### **About Contour Design**

Contour Design Inc., based in Windham, New Hampshire, is a manufacturer of innovative add-on products for Windows, Macintosh and UNIX workstations, specializing in the audio/video and ergonomic markets.
